

## **How to generate differential diagnoses**

1. Visit [www.beta.DDxRx.com](http://www.beta.DDxRx.com) and enter your userid and password in login page
2. Enter at least 3 signs, symptoms or clinical findings
3. Use the review of system tab at the bottom of the search page to enter signs and symptoms
4. You may enter signs symptoms by typing first 2-4 letters, once you master the process
5. Instead of writing in full, select appropriate signs, symptoms, and laboratory findings from drop down box
6. Click search after entering data
7. Focus on high probability differential diagnoses shown in new page
